

State of Idaho's Carbon Footprint Inventory – what path is Idaho on?

**Idaho Department of Environmental
Quality**

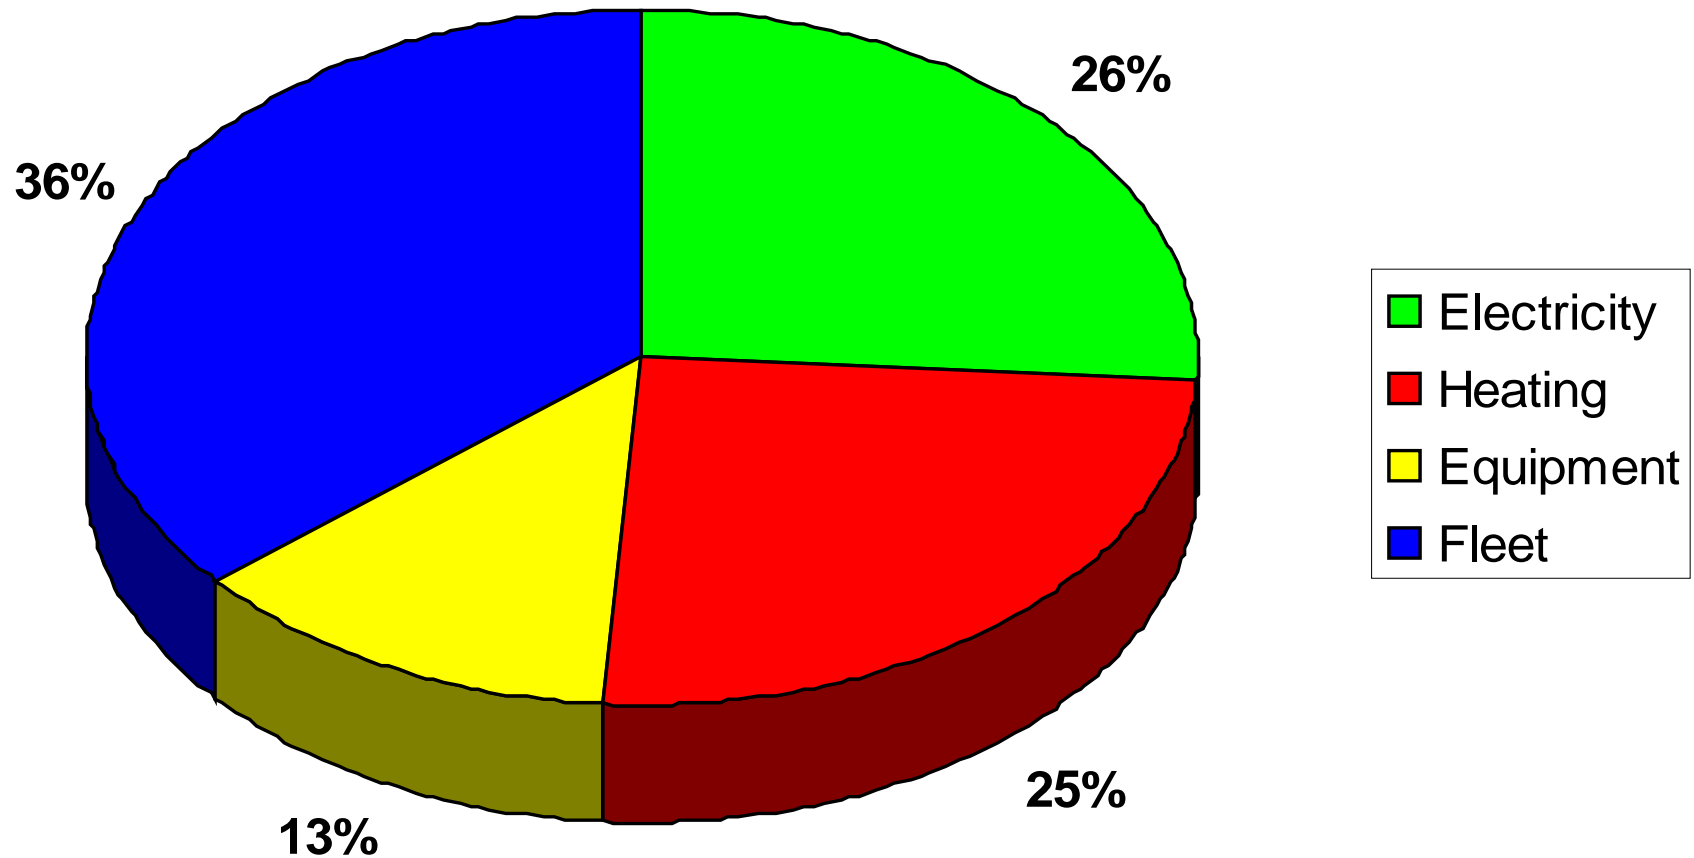

Robert Wilkosz
Mobile and Area Source Program Manager

Climate Change State Actions

- Executive Order on Greenhouse Gases by Governor Otter on May 2007
 - Develop baseline inventories and emission reduction plans for each state agency
 - Coordinate among state agencies
 - Develop further recommendations

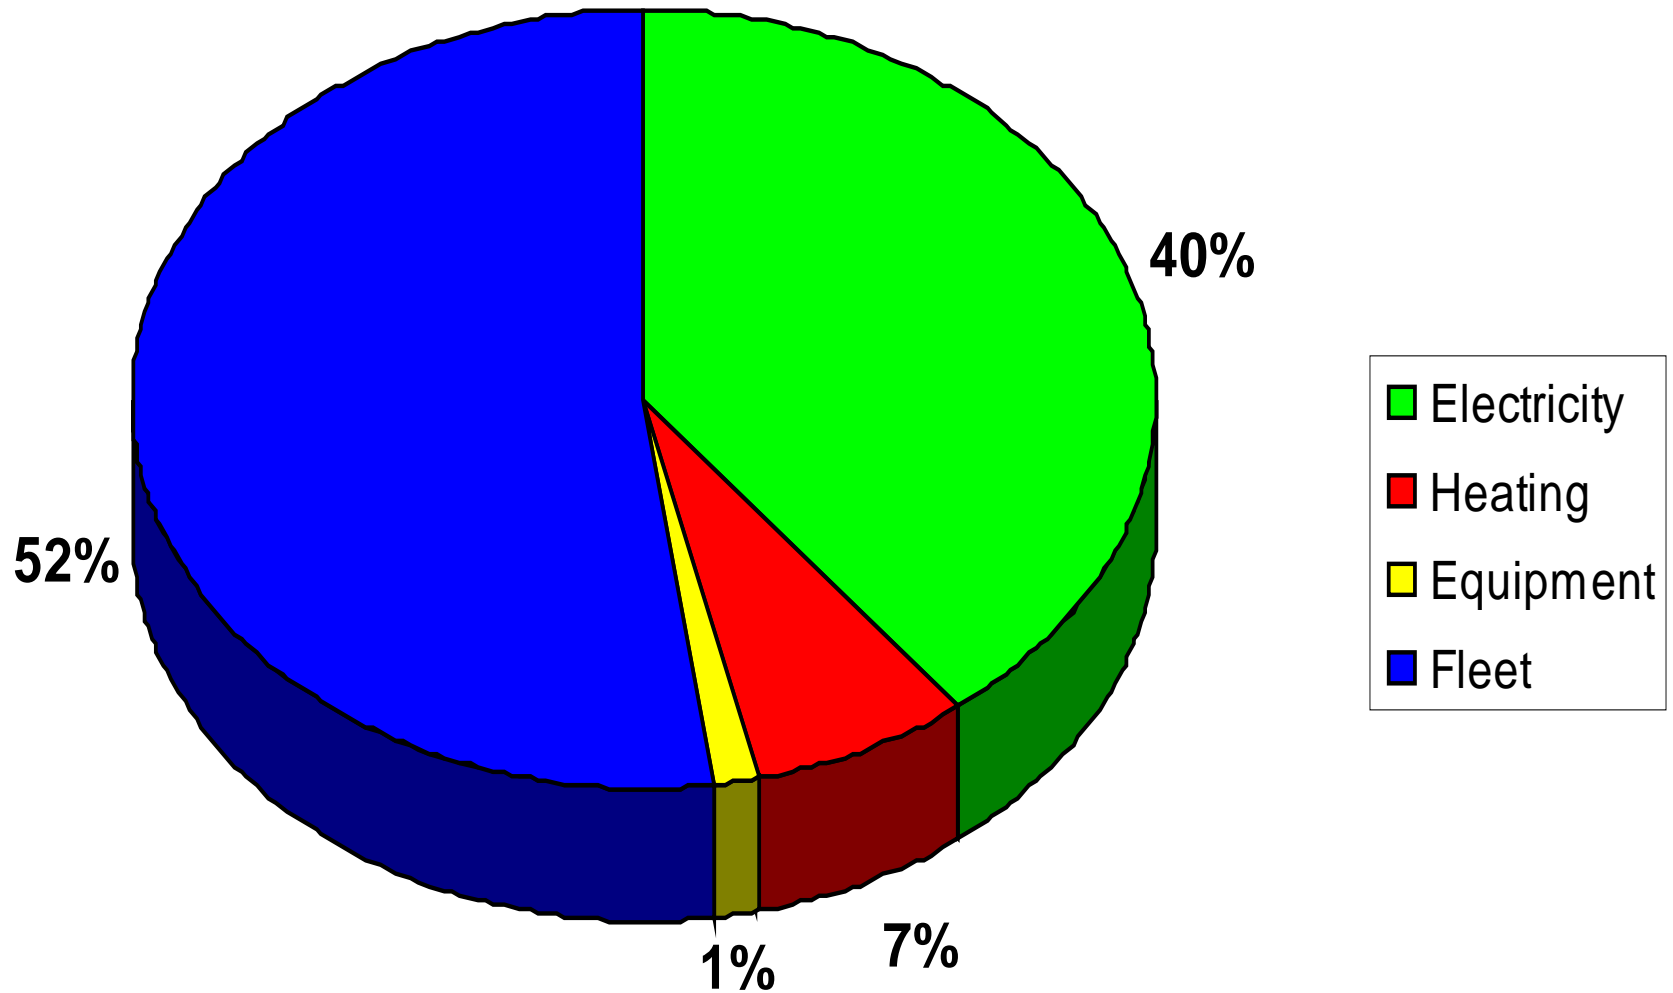

GHG Emission Sources

Cabinet-level State Agencies

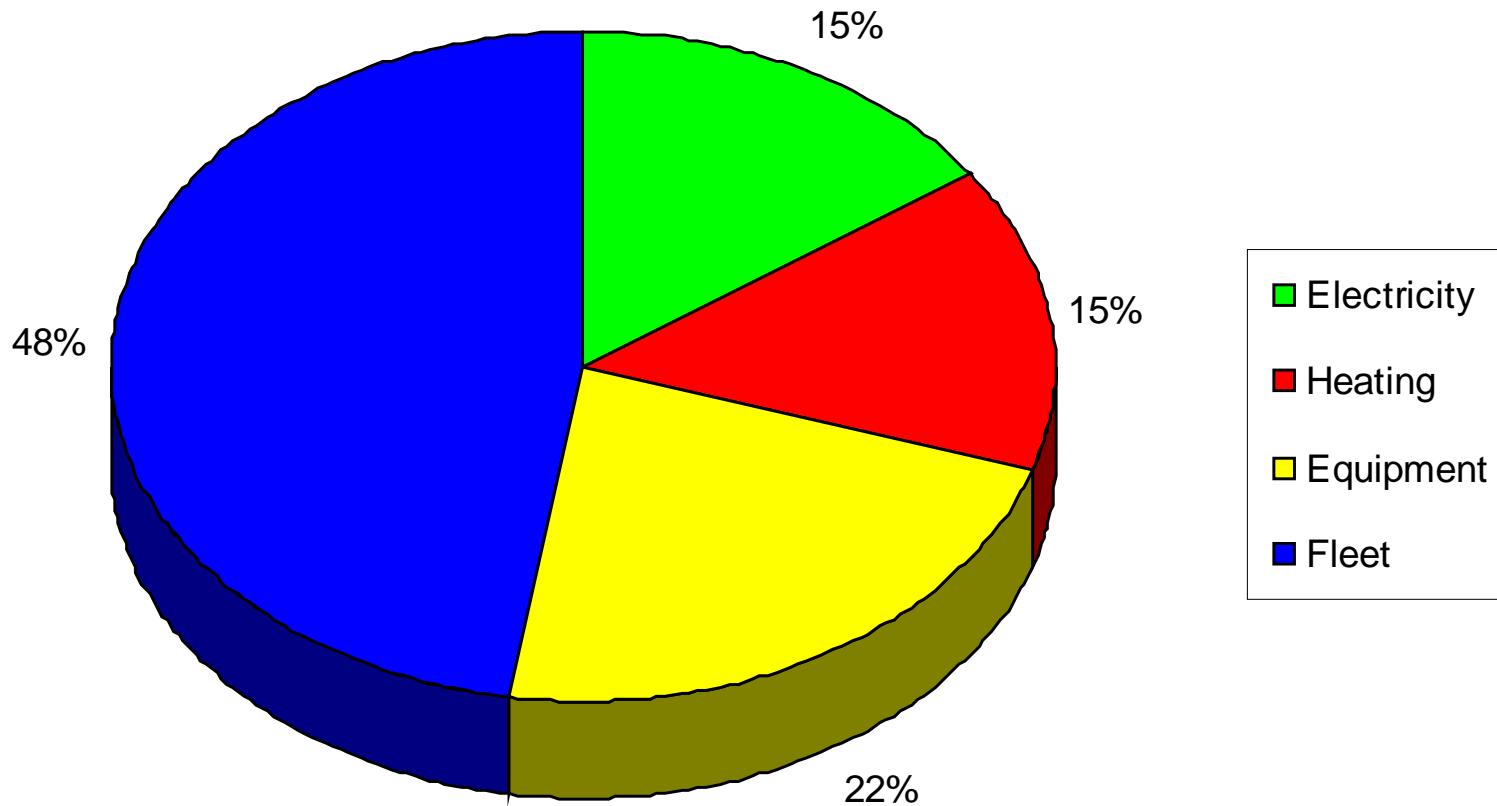

Department of Environmental Quality

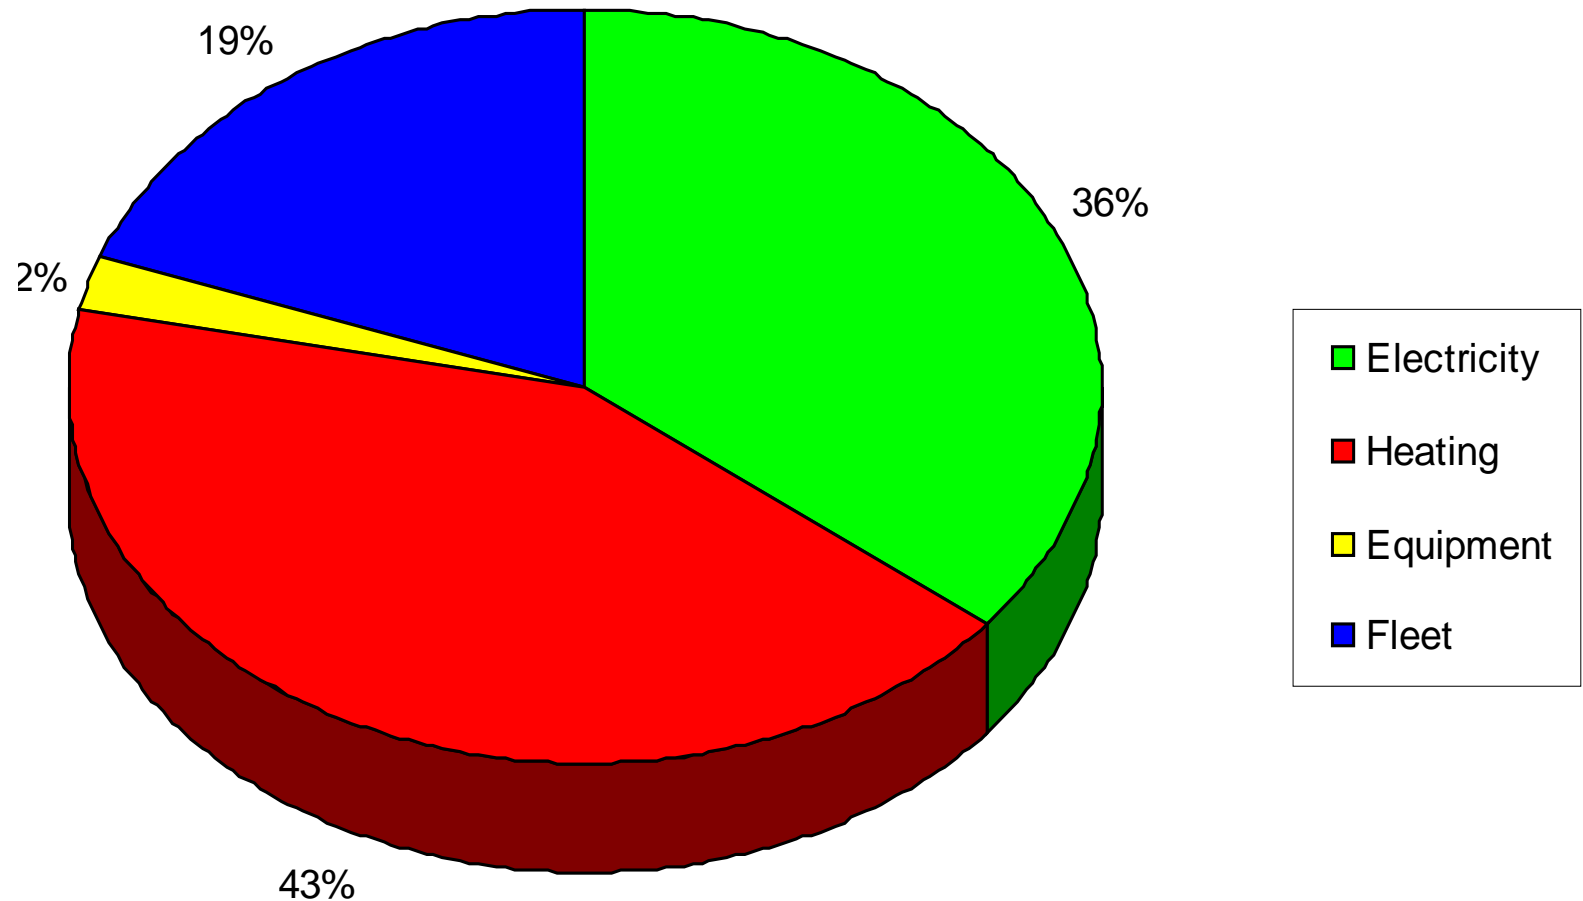

GHG Emission Sources

Idaho Transportation Department GHG Emission Sources

Department of Health and Welfare GHG Emission Sources

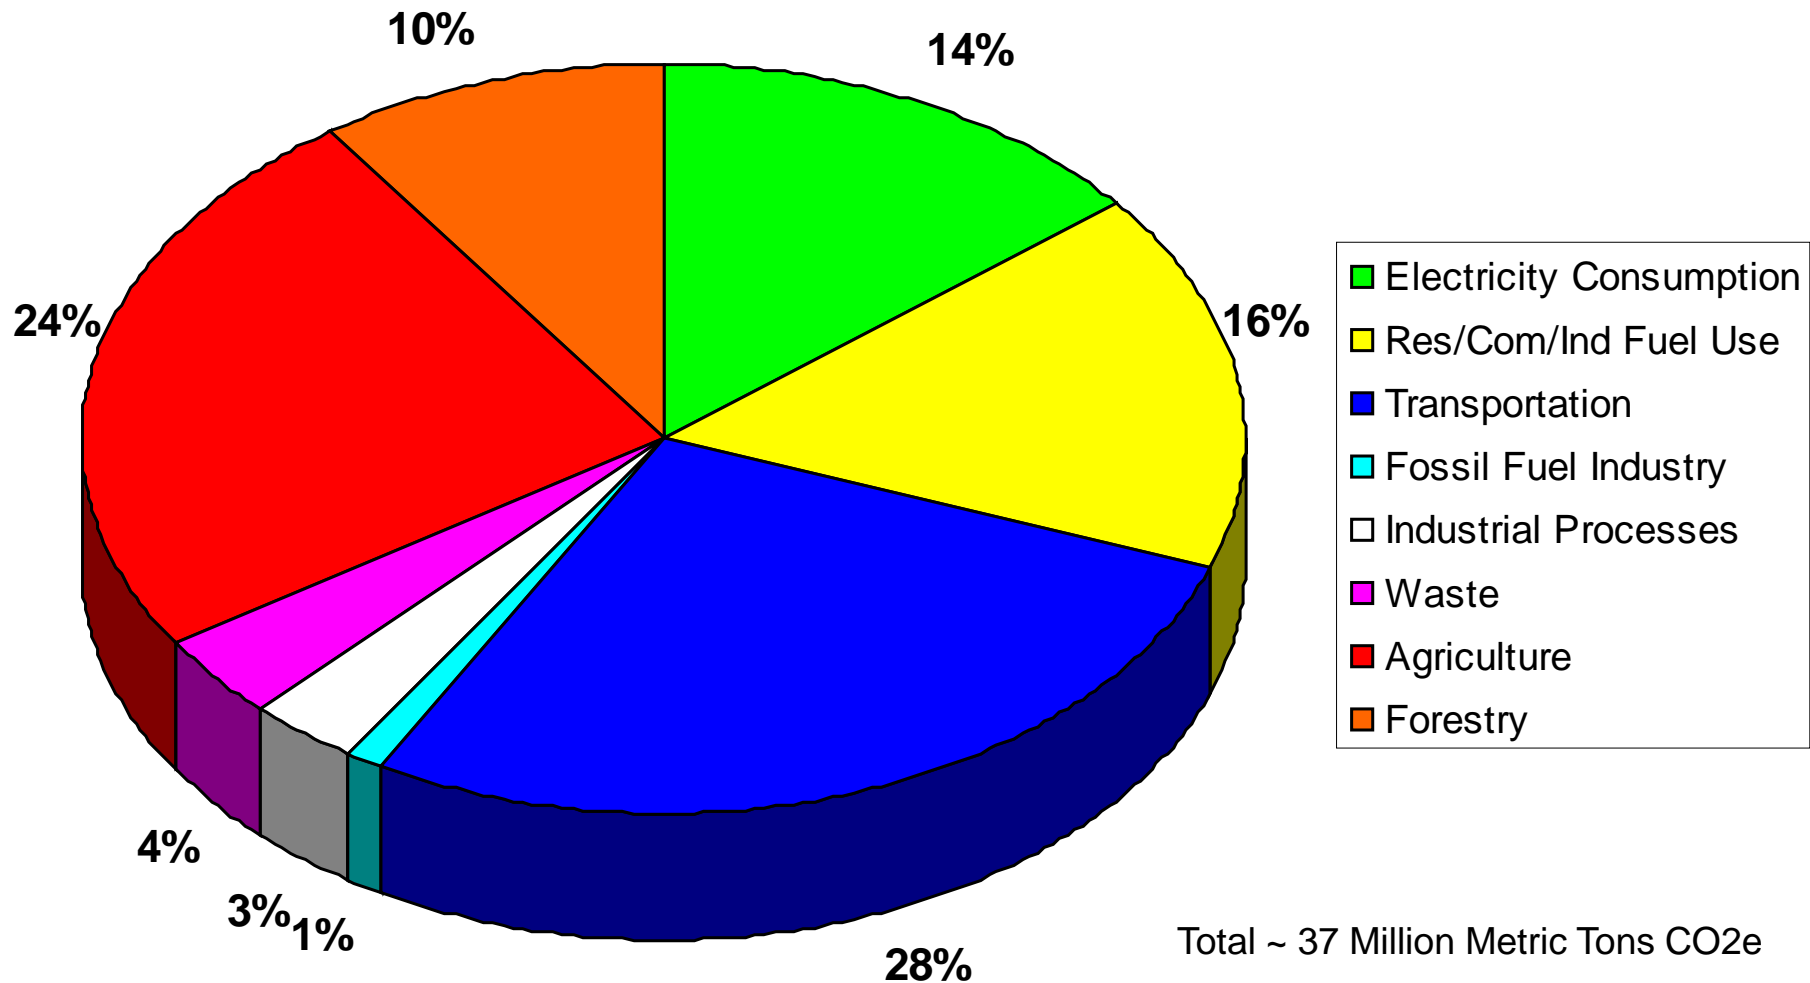

Climate Change State Actions

- Executive Order on Greenhouse Gases by Governor Otter on May 2007
 - Develop statewide greenhouse gas emission inventory

Idaho's Gross GHG Emissions

(2005 By Sector)

What's next?

- EPA to propose mandatory reporting of greenhouse gas emissions this fall
- Final rule due June 2009
- DEQ will implement

Additional State Actions

- ❑ Joined The Climate Registry
- ❑ Developing Telecommuting Policy
- ❑ Established 25 x 25 renewable fuel effort
- ❑ Joined the National Action Plan for Energy Efficiency
- ❑ Joined as observer in the Western States Climate Initiative
- ❑ Developing Carbon Sequestration Plan
- ❑ Fuel efficiency purchase standards for state fleet (E.O. 2007-21)

Benefits

- Reduce greenhouse gases
- Reduce energy consumption
- Long-term cost savings
- Reduce other air pollutants and improve localized air quality
